Daniel Inouye

Senior Software Developer

Los Angeles City, California US

SUMMARY

As a senior software developer with more than 9 years experiences, I am responsible for building **Full Stack** Solutions from scratch for a lot of industries including **E-learning** platforms, **Satellite communication**, **Healthcare** and **Finance**. For example, the global healthcare industry that I have participated was valued at around \$12 billion in 2023 and is projected to reach \$20 billion by 2030. I am sure that I will delivery successful result in any kind of industry that you are planning to improve and move forwards.

WORK EXPERIENCE

Senior Full Stack Developer/Lead

Reymond, Washington, US

Microsoft | Dec 2023 - Dec 2024

- Led a **12-member team** in developing an **online business server**, using **React.js**, **Redux**, **Hooks**, **Bootstrap 5**, **and Pixi.js** to build a **scalable** and **responsive** front end.
- Designed a scalable front-end architecture for serverless and REST APIs with React.js, improving load times by 40% through optimized code structure and NoSQL database integration.
- Built a backend with Node.js, Java, Python, and Golang, applying modern OOP principles
 to reduce server response times by 50% and support 1 million concurrent users.
- Integrated AWS services such as EC2, S3, EKS, SageMaker, and Lambda, ensuring a reliable and scalable cloud infrastructure.
- Developed a custom ChatGPT solution tailored to project needs, improving user interaction and reducing manual workload by 35+ hours per month.
- Achieved measurable results, including a 40% reduction in API response time and a 30% improvement in user interactions.

Full Stack Engineer

Hivex | May 2022 - Nov 2023

- Developed E-Learning, Wellness & Fitness, and Food Delivery & Ride Ordering platforms
 using React, Next.js for the frontend and Node.js, Express.js, and Nest.js for the backend,
 exclusively with TypeScript.
- Designed scalable backend solutions, optimizing API response times by 60%, leading to improved system performance and user experience.
- Improved payment processing workflows with Stripe, reducing transaction times by 40%, increasing successful payments by 25%, and boosting user satisfaction by 15%.
- Used Jira and Trello to manage projects efficiently, improving workflow transparency and team coordination.
- Implemented OAuth authentication and 2FA, strengthening user security and simplifying login processes.
- Conducted code reviews to maintain coding standards and improve code quality, using GitLab and Bitbucket.
- Designed and deployed CI/CD pipelines with Jenkins, Docker, and Kubernetes, significantly reducing development and release cycles.

Middle Web Developer

San Francisco, California, US

TechnoBrains Business Solutions | Jan 2020 - May 2022

- Migrated an **event and appointment management system** from **HTML to React**, improving performance and maintainability for internal company use.
- Maintained a large web application using HTML, CSS, JavaScript, jQuery, and PHP (Laravel), automating monthly supplier payments with PHP and MySQL, reducing manual processing time.
- Developed responsive websites from mockups and designs, independently slicing/extracting PSDs when needed, completing 3-5 page sites within 72 hours, even under tight deadlines.
- Ensured timely and budget-conscious project deliveries, consistently meeting or exceeding client expectations.

EDUCATION

Aug 2015 – Dec 2019

University of Southern California

California, US

Bachelor's Degree, Computer science

SKILLS

- Programming Languages: HTML, CSS, Javascript, Typescript, Python, PHP, C#, Golang, Java
- Frontend: React.js, Next.js, Angular 2, Vue.js, Redux, Hooks, React Query, MUI, JQuery, BS5,
 Tailwind CSS
- Backend: Node.js, Express.js, Nest.js, .NET, .NET Core, ASP.NET, Python, Django, Flask, FastAPI,
 Laravel, GraphQL
- Database: MySQL, PostgreSQL, MongoDB, SQLite, MariaDB, Azure SQL, SQL server
- Cloud and DevOps: Amazon web services(AWS), Azure DevOps services, Google cloud platform,
 Docker, Kubernetes, CI/CD pipelines
